NEW DEVELOPMENTS IN THE FIELD OF EQUINES

An ancient piece of equine equipment has changed very little.

This being the saddle.

How much do we really know about it?

Most people have never looked into this subject, except for saddle makers, or perhaps by someone who has experienced difficulty with a horse being hard to fit.

Surprisingly, the saddle and its internal tree have stories all their own, in their sizes and functions.

To be a true horse person, one should know how to take a measurement of a horse to be able to make an educated saddle purchase.

To ensure unrestricted movement, the most important thing about equipment is fit and function enabling the horse to perform more fluently.

The most important thing about equipment is fit and function.

**HELP IS NOW HERE!
THE LONG AWAITED SADDLE FITTING VIDEOTAPE:
"SADDLE FITTING - THE SCIENCE & ART VIDEO**

by noted and lifelong horsewoman, Shawnah Carman.

Ms. Carman has had extensive involvement in the equine field. She is a renowned saddle-maker, having studied under two master saddle-makers.

Shawnah is well known for teaching saddle fitting in her college classes and in her private clinics.

This informative video, clearly demonstrates how the horse's back works to carry and distribute weight. In addition, the video shows how tree size affects a horse's back.

**THIS VIDEO HAS BEEN RECOMMENDED BY EQUINE VETERINARIANS!
A MUST FOR EVERY EQUINE ENTHUSIAST AND/OR EDUCATOR!**
